

Magnet Mania Tutorial

What you'll need:

Your own artwork, wrapping paper, scrapbook paper, a variety of magnet printables online

Super Glue

Mod Podge (Matte)

Scissors or a $\frac{3}{4}$ inch circle punch

A Sponge brush (if you can find a small, circular one, all the better!)

$\frac{3}{4}$ inch circular magnets

$\frac{3}{4}$ inch clear gems/flat marbles

Directions:

- 1) Start by Punching out or cutting a variety of $\frac{3}{4}$ " circles from your paper selection.
- 2) Dab your sponge (you just need a little!) into the Mod Podge container and brush over the flat part of the marble.
- 3) Place the printed side of your paper circle face down on the marble.
- 4) Carefully squirt a thin layer of super glue in a circular pattern on either side of the magnet.*
- 5) Place the marble on top of the glue and press the two items together with your fingers.
- 6) Let dry for approximately one minute.

*Note: This portion of the project requires adult assistance and supervision, as anything that touches superglue will have an unbreakable bond!
